

IMPORTANT INFORMATION REGARDING THE FEDERATED HERMES FUNDS

SUPPLEMENT TO CURRENT STATEMENTS OF ADDITIONAL INFORMATION

Please add the following to the Statement of Additional Information under the section entitled “**Investment Risks.**”

“LIBOR Risk

Certain derivatives or debt securities, or other financial instruments in which the Fund may invest, as well as the Fund’s committed, revolving line of credit agreement, utilize or may utilize in the future the London Interbank Offered Rate (LIBOR) as the reference or benchmark rate for interest rate calculations. LIBOR is a measure of the average interest rate at which major global banks can borrow from one another. It is quoted in multiple currencies and tenors using data reported by a panel of private-sector banks. Following allegations of rate manipulation in 2012 and concerns regarding its thin liquidity, the use of LIBOR came under increasing pressure, and in July 2017, the U.K. Financial Conduct Authority, which regulates LIBOR, announced that it will stop encouraging banks to provide the quotations needed to sustain LIBOR after 2021. This may cause LIBOR to cease to be published. LIBOR panel banks have agreed to submit quotations to LIBOR through the end of 2021. Before then, it is expected that market participants will transition to the use of different reference or benchmark rates. However, there is currently no definitive information regarding the future utilization of LIBOR or of any particular replacement rate. Regulators have suggested alternative reference rates, but global consensus is lacking and the process for amending existing contracts or instruments to transition away from LIBOR remains unclear.

While it is expected that market participants will amend financial instruments referencing LIBOR to include fallback provisions and other measures that contemplate the discontinuation of LIBOR or other similar market disruption events, neither the effect of the transition process nor the viability of such measures is known. While market participants have begun transitioning away from LIBOR, there are obstacles to converting certain longer term securities and transactions to a new benchmark or benchmarks. The effectiveness of multiple alternative reference rates as opposed to one primary reference rate has not been determined. The effectiveness of alternative reference rates used in new or existing financial instruments and products has also not yet been determined. As market participants transition away from LIBOR, LIBOR’s usefulness may deteriorate, which could occur prior to the end of 2021. The transition process may lead to increased volatility and illiquidity in markets that currently rely on LIBOR to determine interest rates. LIBOR’s deterioration may adversely affect the liquidity and/or market value of securities that use LIBOR as a benchmark interest rate, including securities and other financial instruments held by the Fund. Further, the utilization of an alternative reference rate, or the transition process to an alternative reference rate, may adversely affect the Fund’s performance.”

The Federated Hermes Funds include the following registrants and all of the share classes of the listed portfolios:

FEDERATED HERMES ADJUSTABLE RATE SECURITIES TRUST

- Federated Hermes Adjustable Rate Fund

FEDERATED HERMES ADVISER SERIES

- Federated Hermes Global Equity Fund
- Federated Hermes Global Small Cap Fund
- Federated Hermes International Developed Equity Fund
